

**MASTER'S DEGREE PROGRAMME
CORPORATE GOVERNANCE AND FINANCIAL-INVESTMENT ANALYSIS**

This programme is designed to provide you with comprehensive and rigorous training in advanced accounting and finance. It will offer the breadth and depth of knowledge and expertise necessary to cope with ever changing financial and accounting environment. You gain a rigorous foundation in the application and critical evaluation of management and accounting. It also brings into focus the themes of sustainability, ethics, corporate and social responsibility.

Programme overview

Duration: 2 years full time

Programme provides the latest advanced knowledge in the areas of accounting and finance in the context of a rapidly changing business world. It will give you practical skills and theoretical knowledge in accounting methods and organization, economic analysis and managerial accounting; basics of identification, evaluation, measurement and processing of accounting data, including operations under terms of integration (establishing groups, clusters)

Focusing on both the theory and application of accounting and finance, you will develop academic and employability skills in tandem. Contemporary theories of finance and accounting are studied and put in the context of both the business and the market with the scope to develop your professional identity and valuable employability skills. It will bring you the knowledge and understanding of organizations, the dynamic external environments in which they operate via application of due analytical skills.

You will attend lectures and seminars, works in groups and carry out independent learning. You will complete your studies researching and writing a dissertation on a relevant subject of particular interest to you.
