

Yuichi Oba was born in 1970 in Sapporo (Japan). He received his M.S. in chemistry from Hokkaido University (Sapporo, Japan), and PhD in molecular biomechanics from the Graduate University for Advanced Studies (Hayama, Japan) for fish endocrinology and molecular biology in 1996. In 1996-2000, Research Assistant/Associate of National Institute for Basic Biology (Okazaki, Japan). In 2000-2016, Assistant Professor of Nagoya University (Nagoya, Japan). From Apr 2016, Associate Professor of Chubu University (Kasugai, Japan). Presently he is head of Luminous Organisms Lab in Dept. of Environmental Biology of Chubu University. His research interest is bioluminescence: taxonomy, chemistry, biochemistry, biosynthesis of luciferin, molecular biology, physiology and evolution.
