

National symposium on complexity under extreme conditions

Event date: 22-25 may 2012

Krasnoyarsk Research Centre (Russian Academy of Sciences, Siberian Branch) and Siberian Federal University will host the XVI National Symposium 'Complexity Under Extreme Conditions' on 22-25 May 2012.

The attendees will be introduced to a range of complexity issues (complexity in physical, chemical, biological, environmental, agricultural, educational, technical, information systems, complexity in the humanities) at different levels of organization in the following sessions:

1. Complexity: description and modelling
2. Complexity and sustainability
3. Complexity under extreme conditions
4. Degradation of complex systems under extreme conditions
5. Complexity and rehabilitation
