

Conference: Ultra Dispersed Powder Products, Nanostructures and Materials

Event date: 9–12 september 2012

National conference on the research and technologies of ultra dispersed powder products, nanostructures and materials (9–12 September 2012) will celebrate the 30th anniversary of nanodiamonds' discovery.

Key conference themes:

- physics and chemistry of ultra dispersed (nano) systems;
- generation and properties of ultra dispersed (nano) powder products;
- nanostructures for materials and microtechnologies;
- research, testing and patenting of ultra dispersed (nano) powder products, materials and nanostructures;
- applications of ultra dispersed (nano) powder products and materials;
- educating professionals in the field of new materials and technologies.

Conference organizers:

- Siberian Federal University,
- Altainano Association,
- Altai Company,
- Institute of Technologies in Chemistry and Energy Production, Russian Academy of Sciences, Siberian Branch,
- Altai State Technological University,
- Krasnoyarsk Scientific Centre, Russian Academy of Sciences, Siberian Branch.
