

SibLab's project research workshop

On August 22nd, a Workshop “Environment and Global Climate Change” within the joint German-Russian Project “Central Siberian Laboratory on Global Climate Change - Sib-Lab” was held at the Center for Grant-Oriented Activity, Siberian Federal University (SibFU).

The Workshop participation was represented by 46 researchers and PhD students from the Russian Federation (SB-RAS institutions and universities), SibLab project partners from Jena and Berlin, Germany and by exchange students from France as starting researchers.

Fifteen presentations contributed to the Workshop, which highlighted some R&D activity in the areas of environment and climate change in Siberia and Europe. The Workshop was launched by Dr. Sergey V. Verkhovets, the SibLab project Principal Investigator from the RF side and the Vice Rector for Research and International Affairs of SibFU and Alexey A. Romanov, the project Manager from SibFU. The Workshop presentations are available in the attachment.

The networking of SibLab is still in progress. New participants are welcome, the profile is attached.
