

Junior Scientist Energy Research Fellowship Competition

CRDF is pleased to announce a new initiative to promote research in the field of renewable and sustainable energy. CRDF's Junior Scientist Energy Research Fellowship is a three-month opportunity for Eurasian Junior Scientists to travel to the United States and work with a U.S. specialist to pursue a project that aims to reduce worldwide dependency on non-renewable energy resources.

The program's focus is to provide Junior Scientists with the opportunity to frame an issue and pose a research project in the following specific areas:

- Technologies for Increased Energy Efficiency and Conservation
- Alternative Energy Development and Applications
- Each research fellowship will provide up to **USD 7,500**, including per diem stipends, travel funds, accommodation, and related research expenses.
