

Application submission for the International Arctic Winter School is open

The SibFU Grant Center invites postgraduate students of the university of all degree programs with sufficient knowledge of oral and written English to participate in the International Winter Arctic School "POPs and Chemicals of Emerging Arctic Concern (CEACs) in the Arctic under Climate Change".

The school will be held online from 4 to 17 January 2021.

The school is supported by the International Project Office of the Harbin Institute of Technology, which is included in the top 500 universities and in the network of participating organizations of the University of the Arctic.

For assistance in preparing and registering an application, contact the [SibFU Grant Center](#). All details are available on the [event page](#).
