# Series of webinars in mathematics and programming

Event date: 3 february – 20 april 2021, 14:00

Event place: платформа Cisco

From February 3 to April 20, 2021, Siberian Federal University and Northern University of Malaysia will hold a series of joint online webinars in English.

The first webinar, Maleficent vs Beneficent: Towards Friendly Artificial Intelligence, is for an audience interested in current trends in artificial intelligence. The speaker will be Dr Azizi Ab Aziz, who directs a Relational Machines Group at Human Centered Computing Group, University Utara Malaysia. All webinars will be held on [Cisco's platform](#).

Schedule:

- **February 3, 14:00 (+7 UTC)** — Maleficent vs Beneficent: Towards Friendly Artificial Intelligence; [Apply](#)
- **February 24** — Swarm Intelligence Algorithms and Real-World Problems;
- **March 10** — Bayesian Data Analysis: From Elementary Models to Networks;
- **March 23** — Computational Probabilistic Analysis: Models and Methods;
- **April 6** — SOLID: The First 5 Principles of Object-Oriented Design;
- **April 20** — Being a Hacker or Defender: Tracking SibFU Students in Cybersecurity.

Information on the timing of coming webinars and links to participating will be posted soon.
