

Construction work on two university campuses is proceeding

Work on the university campuses is among top regional investment projects. This year Krasnoyarsk Krai Regional Assembly approved an investment of 500 million roubles (\$20 million) to complete the construction of a research lab, the university library and the main administrative building. The Regional Assembly is planning to invest an additional 990 million roubles (about \$40 million) in construction and engineering work for the university's benefit.
